THE
FARMER'S ALMANACK?

FOR THE YEAR OF OUR LORD,

1829;

Being the first after Bissextile, or Leap Year ;

CALCULATED FOR THE MERIDIAN OF HALIFAX IN NOVA-
SCOTIA, BUT WILL SERVE FOR ANY PART
OF THE PROVINCE.

Containing, besides the large number of Astronomical Calculations
and the Farmer's Calendar for every month in the year, a
great variety of useful and entertaining matter.

“ Still on its march, unnoticed and unfelt,
Moves on our being. We do live and breathe,
And we are gone. The Spoiler heeds us not.
We have our spring-time and our rottenness ;
And as we fall, another race succeeds,
To perish likewise.”

HALIFAX, N. S.

SOLD BY C. H. BELCHER.

A PERPETUAL WEATHER TABLE.

By Doctor HERSCHEL.

The following table constructed by the celebrated Doctor Herschel, upon a philosophical consideration of the attraction of the sun and moon in their several positions as to the earth, and confirmed by the experience of many years actual observation, may, without doubt, suggest to the observer, what kind of weather will probably follow the moon's entrance into any one of her quarters, and that as near the truth, that it will be very seldom found to fail.

If it be a new or full moon, or the moon enters into the first or last Quarter, at the hour of 12 at noon, or between the hours of 2 and

From the above Table it will be seen that the nearer to midnight either the moon's periodical changes (i. e. within two hours either before or after it) the more fair the weather is in summer; while the nearer to noon that the changes take place, the reverse may be expected. Fair weather may also follow when either of the periodical changes occur during the afternoon six hours, viz. from four to ten, but this is mostly dependant on the wind.—The moon's entrance during all the hours after midnight except the two first, is unfavourable to fair weather. The like may nearly be observed in winter. Every farmer ought to preserve a copy of this table, and carefully to regulate his pursuits by its indications. Such a line of conduct might materially promote his comforts and his interest, while in no case would it disturb his prospects, or destroy his hopes.

*A Packet leaves Digby for Saint John, New-Brunswick, every Thursday evening, and arrives there the next morning; leaves St. John on Saturday at 12 o'clock, and arrives at Digby the following morning.

† The Parrsboro' Packet sails regularly to Windsor and Horton every week, from the 1st April to Christmas; leaves Parrsboro' on Monday (wind and weather permitting) so as to be at Windsor on Tuesday, and will sail from thence (for Parrsboro') the first high water that happens at or after 8 o'clock in the morning,—leaves Parrsborough on Thursday, so as to be at Horton on Friday; and will sail from thence for Parrsboro' the first high water after 8 o'clock in the morning.—The Packet frequently goes to Windsor twice a week.

DIRECTIONS FOR SAILING UP HALIFAX HARBOUR.

SAMBRO Island and Light House is in Latitude 44 deg. 30 min. N. and longitude 63 deg. 42 min. W.

From the westward, bring the Light to bear N. E.; if it bears more easterly, stretch to the southward till it bears N. E. (and as much northerly as you please, there being no shoal or ledge to the southward;) then keep it open on your larboard bow; give it more than a mile and a half birth, as much more as you please.

NOTE.—The easternmost of the western ledges lie from the Light S. W. distant 2 miles; the other W. S. W. about one league; the eastern ledges lie in a range nearly, some above water, the outermost one mile and a half from the Light, bearing from it E. N. E.

When the Light bears north distant about 2 miles, run N. E. 4 miles, then north will carry you to Chebucto Head; at a proper distance clear of all danger.

When abreast of Chebucto Head, run N. & W. for the south point of George's Island.

When within half a mile of George's Island, you may enter the harbour west of it in 12 fathoms, or east of it in fifteen fathoms water.

In passing between Sandwich point and Mauger's beach, run nearest the point, to shun a shoal which runs off S. W. from the beach.

There is also a shoal lying one mile south of Sandwich point.

Coming from the eastward, run for the Light and you cannot fail seeing Chebucto Head, as you open Halifax Harbour; the Light being 4 miles distant from the Head to the S. W. of it.

The Light-House erected last year on the Tower at the west end of Mauger's Beach, at the entrance of Halifax Harbour is for the express purpose of leading vessels up the harbour, the greater part of the eastern side is darkened, viz— from N. E. by N. to S. half E.—The following are the directions published by the Commissioners of Light Houses, which should be attended to:—

"Vessels coming from the Eastward must keep Sambro Light open to the southward of Chebucto head and until the light opens on Mauger's beach, which will then bear N. 4 W--they will then be to the westward of Thrum Cap Shoals, and may shape a course up the harbour, always keeping the light on the Beach open, and on the starboard bow.

Vessels coming from the westward will see this Light when they are as far to the eastward as Chebucto head, by keeping it open, and on the starboard bow, it will lead them up to the beach.

This light will appear of a red colour, which will distinguish it from any other on the coast. It is fifty eight feet high from the level of the sea."

Signals made at Fort George when vessels are coming up the Harbour.

ECLIPSES.

13

Of each of the two great LUMINARIES in the heavenly system, there will be two Eclipses this year, as follows—

I. The first will be of the moon on Friday March 20th, at 9h. 29m. morning, invisible. On the N. W. Coast of North America, and the N. E. of Asia, it will be visible, about 44 digits eclipsed on the Moon's northern limb.

II. The second will be of the Sun on Friday April 3d, at 5h 50m afternoon; yet by reason of the Moon's south latitude it will not be visible in North America. But in the South Pacific Ocean, lat. $32^{\circ} 15'$ S. long. $149^{\circ} 6' 3''$ W. of London it will be visible, central and total, on the meridian. Also, at the Three-King's Islands, and the North of New Holland, it will be visible and very great, nearly total. ☾'s lat. $35^{\circ} 15'$ S.

III. The third will be of the Moon, on Sunday, Sept. 13th, visible, as follows :

Beginning at	- - -	1h. 12m	} Morning.
Ecliptic opposition,	- 2	16	
Middle,	- - -	2 24	
End,	- - -	3 36	
Duration,	- - -	2 24	

Digits eclipsed $6^{\circ} 5'$ on the ☾'s southern limb, in the north side of the Earth's shadow.

IV. The fourth and last will be of the Sun, on Sunday, Sept 27, at 9h 32m. evening; Sun below the horizon, of course invisible. But in the North Pacific Ocean, lat. $39^{\circ} 22' 45''$ north, longitude $157^{\circ} 5' 30''$ E. of London, it will be visible, central, and annular on the meridian. It will also be visible and annular at the City of Jeddo, in the island of Nippon, in the forenoon; at the City of Pekin, in China, the sun will rise with about 8 digits eclipsed; and in the Gulf of Japan, the Yellow Sea, the peninsula of Corea, and the western part of China, in those places, this will be a great and visible eclipse. ☾'s lat. $33^{\circ} 45'$ N.

Explanation of the Calendar Pages.

LEFT HAND PAGE.—First column contains the days of the month. Second, the day of the week. Third, the rising of the sun. Fourth, the setting of the sun. Fifth, the length of days in hours and minutes. Sixth, Sun's declination in degrees and minutes. Seventh, the moon's age in days. Eighth, the moon's rising or setting. Ninth, the Moon's southing. Tenth the moon's place in the signs. Eleventh, high water at Halifax. Twelfth, Sun slow or fast.

RIGHT HAND PAGE.—First column, days of the month.—Second, Miscellaneous Phenomena, Holidays, Weather, &c. Third, Farmer's Calendar.

The top of the columns on each page shows the Moon's phases, or the times of new and full moon, and of the first and last quarter or two quadratures with the sun.

New Moon 5th d. 11h. 38m. morn. First Quar. 12th d. 3h 4m morn.

Winter. JANUARY begins on Thursday. 15

Thou, Nature! ever-changing, changest not—

The evening and the morning duly come—

And spring, and summer's heat, and winter's cold—

The very sun that look'd on Paradise,

On Eden's blooming bowers, and sinless man,

Now blazes in the glory of his power.

And thus the months shall come, and thus the years

Revolve ; and day, alternating with night,

Lead on from blooming youth to hoary age,

Till time itself grows old ; and Spring forgets

To herald Summer ; and the fearful blank

Of Chaos overspreads, and mantles all !

Winter. FEBRUARY begins on Sunday. 17

Muttering, the winds at eve with blunted point,
 Blow, hollow-blustering, from the south. Subdued,
 The frost revolves into a trickling thaw.
 Spotted, the mountains shine, loose sleet descends,
 And floods the country round. The rivers swell,
 Of bonds impatient. Sudden from the hills,
 O'er rocks and woods, in broad brown cataracts,
 A thousand snow-fed torrents rush at once,
 And where they rush, the wide-resounding plain
 Is left one slimy waste.

Spring.

MARCH begins on Sunday.

19

March ! we welcome now thy reign,
While the early shoots appear,
Destined in fair Ceres' train,
To enrich the ripen'd year.
Snows that whiten'd o'er the lands,
Melt before the approaching ray ;
Winter bids his grisly band,
Onward hold its wonted way.
Earlier from the glowing east,
Now the ruddy streaks appear,
'Till the sun in Aries placed,
Weights in equal scales the year.

The husbandman seizing his plough,
 Walks round in the pride of his might ;
 The drops of his masculine brow
 Fall freely as dews of the night.
 His home is the centre of rest,
 His heart is the birth-place of joy ;
 All creatures around him are blest
 And praise is their sweetest employ.
 And evening so calmly serene,
 Like age in a holy decline,
 Seems longing and lingering between
 Two regions, with fervour divine.

DM	Holidays, Weather, &c.	FARMER'S CALENDAR.
1	Tides rise. <i>grows much</i>	It is now time that farmers pay particular attention to all that is connected with their occupation. "He who trusts to chance for a crop, deserves none, and he generally has what he deserves." He that is negligent and sluggish in this month will be generally so throughout the year, and perhaps all his life time ; and a shabby farm is portentous of neglected morals, and inclination to idleness, tippling, and litigation. Come then, let us be busy with the plough that the earth may be thoroughly stirred. No matter how much your ground is tilled with this instrument, more especially if your manure should be short. House your sleighs and sleds, unless you prefer (as some do) to let them take the benefit of the sun and rain through the season. If your spring grain is not all sown, lose no time in getting it into the ground.

"Lo ! the winter is past, the rain is over and gone; the flowers appear on the earth, the time of the singing of birds is come, and the voice of the turtle is heard in our land." The grandeur and beauty of the glorious Sun—the mildness and serenity of the balmy air—the flowers springing from the green earth—the lively animal creation—the feathered choir, hymning their Creator, and paying their homage in harmony—all invite man to join in the rational devotion, and improve the fragrant oblations of Nature, by mingling with the rising odours the more refined breath of praise.

At last, of snowy white, the gather'd flocks
Are in the wattled pen innum'rous press'd,
Head above head: and rang'd in lusty rows,
The shepherds sit, and whet the sounding shears.
The housewife waits to roll her fleecy stores,
With all her gay drest maids attending round.
Meantime their joyous task goes on apace ;
Some mingling stir the melted tar, and some
Deep on the new-shorn vagrant's heaving side
To stamp his master's cipher ready stand ;
Others the unwilling wether drag along ;
And, glorying in his might, the sturdy boy
Holds by the twisted horns th' indignant ram.

Summer.

JULY begins on Wednesday.

27

When the fresh spring in all her state is crown'd,
And high luxuriant grass o'erspreads the ground,
The labourer with a bending scythe is seen,
Shaving the surface of the waving green ;
Of all her native pride disrobes the land,
And meads lays waste before his sweeping hand ;
While with the mounting sun the meadow glows,
The fading herbage round he loosely throws :
But, if some sign portend a lasting shower,
Th' experienc'd swain foresees the coming hour ;
His sun-burnt hands the scattering fork forsake,
And ruddy damsels ply the saving rake ;
In rising hills the fragrant harvest grows,
And spreads along the field in equal rows.

DM	Holidays, Weather, &c.	FARMER'S CALENDAR.
1	♂ ☾ ♀. <i>fine weather</i>	This is a busy month, but the provident farmer finds no difficulty in getting through it, without any unnecessary waste, by the hurry and confusion of his business. He pays his hands well, keeps them well, treats them well, and works them well ; consequently his work goes on regular and briskly : his hay and grain are quickly secured ; and the evening of his harvest-home brings joy to him and his family. Have a care that you do not drink too much cold water when heated ; much liquor of any kind weakens the stomach, and impairs the general vigor of the body. Make your hay so dry as to prevent its heating ; but look out that you do not make it a mere parched straw without any of its natural juices. Cut close and even at the bottom, for remember that an inch at the bottom outweighs many at the top.

Nature, attend ! join every living soul,
Beneath the spacious temple of the sky,
In adoration join ; and, ardent raise
One general song, to HIM, who rules on high !
Soft roll your incense, herbs, and fruits, and flowers,
In mingled clouds, to HIM, whose sun exalts,
Whose breath perfumes you, and whose pencil paints.
Ye forests bend, ye harvests wave to HIM ;
Breathe your still song into the reaper's heart,
As home he goes beneath the joyous moon

Autumn: SEPTEMBER begins on Tuesday. 31

“ First of the months in sober Autumn's train,
September comes and glads the rural swain ;
For now the heats of burning Summer die,
And finer breezes fan a cooler sky.
See, smiling Ceres waves the yellow fields,
See, blushing Bacchus, copious vintage yields ;
Pomona laughing, pendent globes unveils ;
And jocund Vesta drinks the mellowing gales.
The shortened day now meets the equal night,
And silver dews deck all the fields in white;
Borne by her staff, dame Nature walks reclin'd,
Downwards she tends and leaves her gifts behind.

Behold the labourer of the glebe who toils
 In dust, in rain in cold and sultry skies ;
 Save but the grain from mildews and the flood,
 Nought anxious he what sickly stars ascend.
 He knows no laws by Esculapius given ;
 He studies none. Yet him nor midnight fogs
 Infest, nor those evenom'd shafts that fly
 When rabid Sirius fires th' autumnal noon,
 His habit pure with plain and temperate meals,
 Robust with labour and by custom steel'd
 To every casualty of varied life ;
 Serene he bears the peevish eastern blast,
 And uninfected breathes the mortal south.

November's sky is chill and drear ;
 November's leaf is red and sear.
 No longer Autumn's glowing red,
 Upon our forest-hills is shed :
 The kine before the frowning heaven,
 To shelter'd dale and down are driven ;
 Where yet some faded herbage pines
 And yet a watery sun-beam shines :
 In meek despondency they eye
 The wither'd sward and wintry sky ;
 And far beneath their summer hill,
 Stray sadly by the gurgling rill :
 A cowering glance they often cast,
 As deeper moans the gathering blast.

Thump after thump resounds the constant flail,
That seems to swing uncertain, and yet falls
Full on the destined ear. Wide flies the chaff,
The rustling straw sends up a frequent mist
Of atoms, sparkling in the noon-day beam.
Come hither ye that press your beds of down,
And sleep not; see him sweating o'er his bread
Before he eats it—'Tis the primal curse,
But softened into mercy; made the pledge
Of cheerful days, and nights without a groan.
